

# Street LED Display

Street led display, also called led poster by some people, is more and more popular. Normally speaking, the size of street led display is not too big but visitors are also very close to it. That requires a high resolution. That is why we have P3, P4, P5 indoor street led display and P6, P8 outdoor street led display.

## 1.Photos of street led display (waterproof)

**We equip the street led display with a bottom case. There are two kinds of bottom case. One is waterproof and the other one is not. Photos here are waterproof.**

**Why waterproof? Toughened glass. You must have seen this. So this bottom case is often used outdoor.**

**The side and back of this kind of street led display. Very convenient for maintainance.**

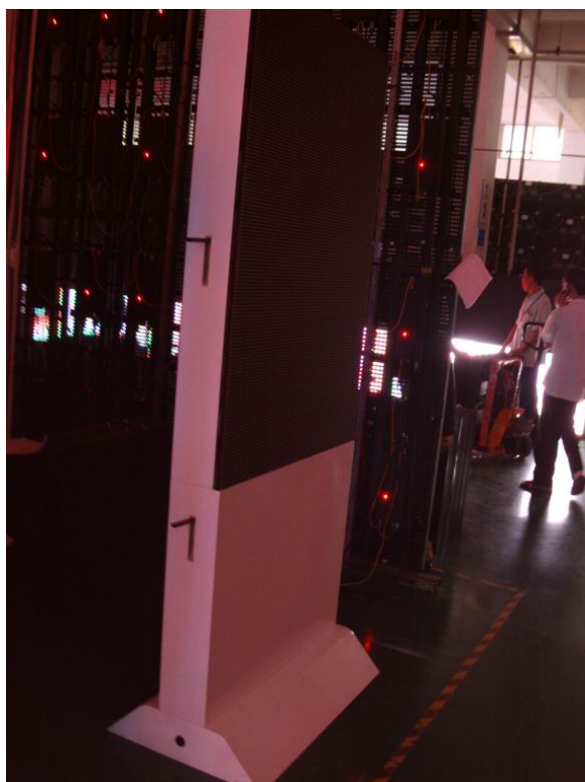

## 2.Photos of street led display(not waterproof)

**Why not waterproof? The material of this kind of bottom case is iron. And it is usually used indoor.**

**The side and back of it.**

**Thanks for your reading.**
