Photo of Abnormity LED Screen ---Prepared by ERALED

No matter you are a LED screen buyer or supplier, I believe that we are all attractive by the beauty of the LED screen. However, what we usually saw is the mostly the regular LED screen. That is to say, it is normally the square shape or rectangle shape and the length to height is usually 4:3 or 16:9.

What I want to share with you today is the abnormity LED screen. If you are careful, we can still notice them in our city everyday.

1, Spherical LED Screen

Address: ERALED Industry Park, Xincheng Road, Shajing town, Bao an District, Shenzhen, China
