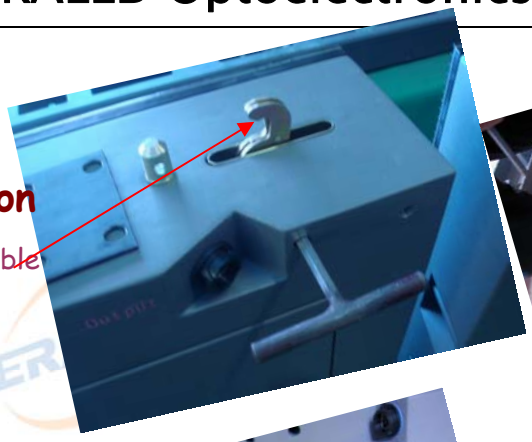
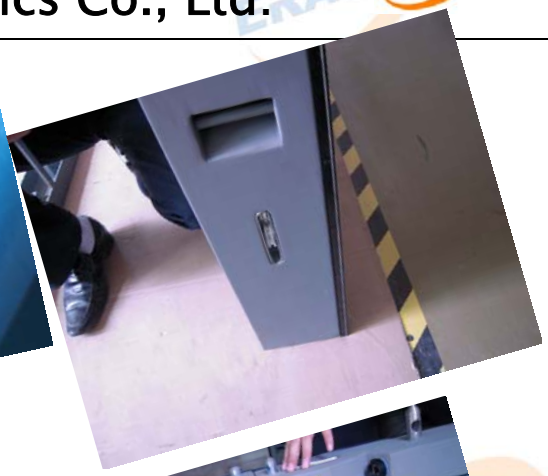
Lock button

For fast assemble the screen





Lock screen

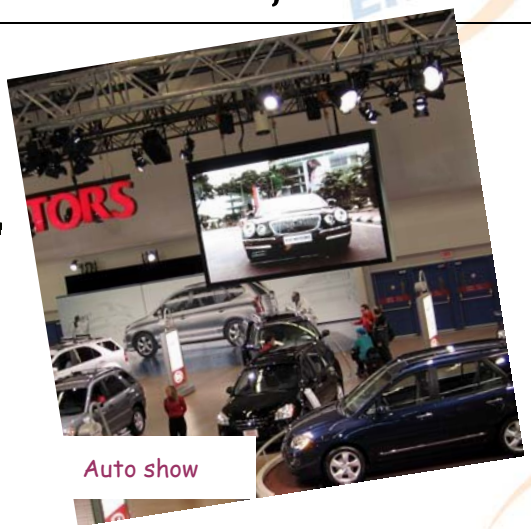
Connect the screen together

Combine them together

Applications

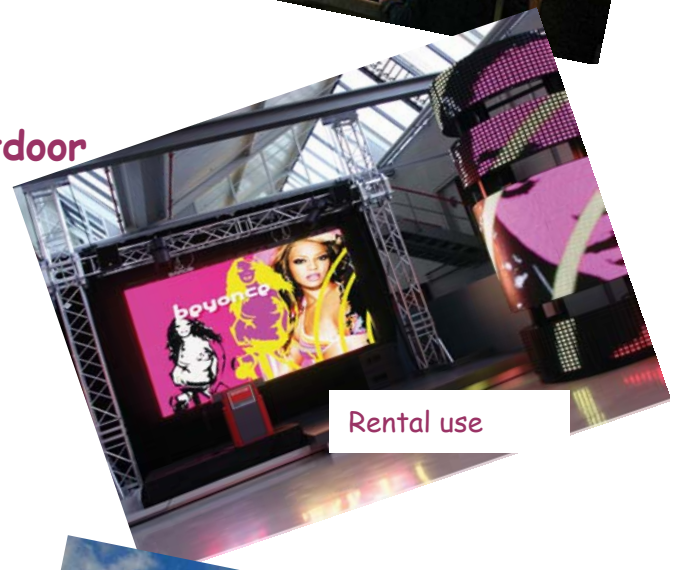
Indoor

Indoor normal use



Auto show

Semi-outdoor

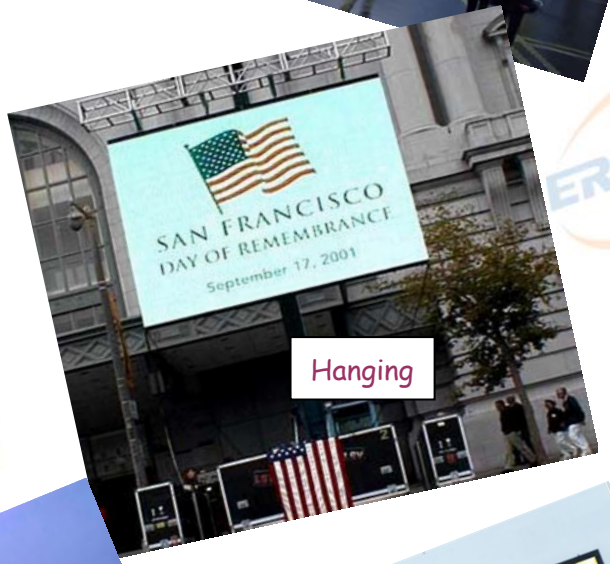


Rental use

Shop central

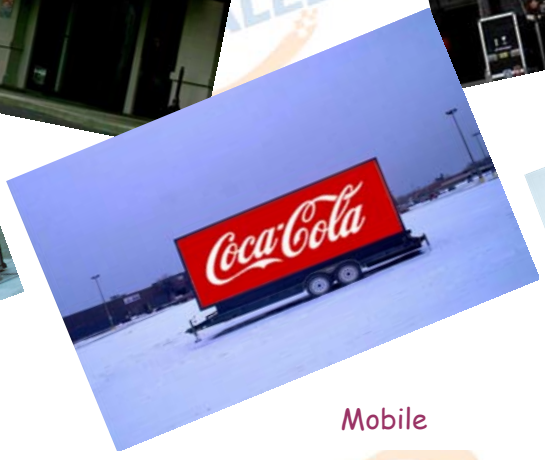
Outdoor

Billboard



Hanging

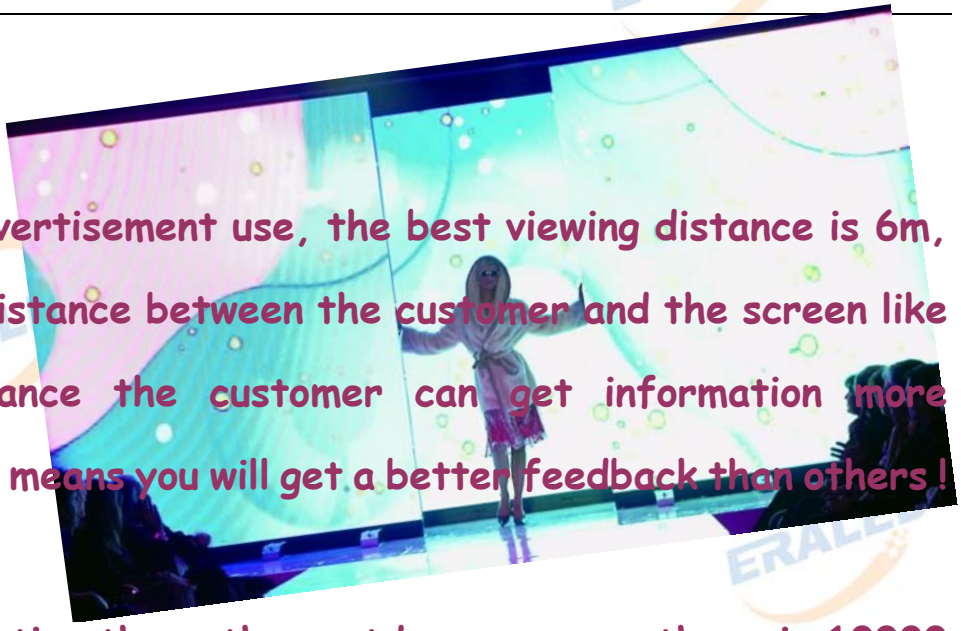
Fixed



Mobile

Billboard

Attention :



P10 is the main stream for advertisement use, the best viewing distance is 6m, this is a comfortable viewing distance between the customer and the screen like you watch TV, in this distance the customer can get information more conveniently and effectively, it means you will get a better feedback than others !

The screen has a higher resolution than other outdoor screen , there is 10000 dot in 1 SQM , P12 is 6944, P14 is 5102 , P16 is 3906 . High resolution means high quality in the display show , audience can get a better viewing effect from this screen than others .

So if you have a requirement on this advertisement screen , what are you waiting for , just tell me , our professional team will design the best suitable plan for you !
